FIG. A. (GERMANY) MAUSER RIFLE, the infantry arm of the German Army. Stamped on the left of the receiver "GEW 98" meaning Gewehr (weapon) of the year, 1898. The rifle is shown with the action open and bolt withdrawn to the rear, equipped with the breech-cover, designed to keep wind and dirt out of the mechanism while in use in the trenches. It will also be noticed that the extra magazine, made to hold 20 cartridges, is attached. A muzzle cover is in its proper place as well. The bayonet shown is the model brought out with the gun in '98, but during the War over forty different designs were made; these are shown in a book we have on sale, see notice elsewhere. The calibre of GEW '98 is .31 and the magazine holds five shots.
